### PROFESSIONAL SUMMARY

Senior Backend Engineer with 20+ years of experience designing, developing, and modernizing large-scale backend systems, high-volume APIs, microservices, and enterprise platforms.

I have worked on strategic projects in finance, e-commerce, healthcare, and digital marketing. At Sicredi, one of Brazil's largest cooperative financial institutions, I acted as the main engineer behind the evolution of an initial Python PFM proof of concept into a production-ready event-driven architecture using Scala, Akka Actors, Apache Flink, Kafka, MongoDB, and microservices. The solution enabled real-time financial data processing with strong integrity guarantees and later served as a reference architecture for other Sicredi Digital initiatives.

At Panvel, one of Brazil's largest pharmacy chains, I contributed to the full Java backend rewrite of the e-commerce platform and the migration from WebSphere to JBoss, while also leading the adoption of Scrum and the first mobile e-commerce version.

More recently, I worked with Quartile, a US-based digital marketing company, building and maintaining high-volume backend applications with C#, Python, Azure Functions, Azure Service Bus, SQL Server, and OpenAPI. I also used AI tools such as Claude and ChatGPT to support development, automation, analysis, documentation, and productivity.

I am currently expanding my focus on AI-Driven Development through practical use of AI tools and postgraduate studies in corporate AI integration, including LangChain4j, RAG, and MCP patterns.

### KEY SKILLS

**Backend & Architecture:** Java, Spring Boot, Backend Development, Microservices, Cloud Computing, Event-Driven Architecture, Distributed Systems, System Design, Software Architecture, REST APIs, High-Volume APIs, API Design, BFF, Legacy Modernization, Performance Tuning

**Cloud, Messaging & Data Processing:** Amazon Web Services (AWS), Microsoft Azure, Azure Functions, Azure Service Bus, Azure Storage, Apache Kafka, Apache Flink, Akka, Akka HTTP, Data Pipelines, Data Migration

**AI & AI-Driven Development:** AI-Driven Development, Generative AI, AI Integration, AI Agents, RAG, LangChain4j, MCP, Claude AI, ChatGPT, LLM APIs

**Languages & Frameworks:** Java, Scala, Python, Kotlin, C#/.NET, Spring Framework, Quarkus, FastAPI, Pydantic, pandas, Java Enterprise Edition, Hibernate, Play Framework, Struts

**Databases & Search:** SQL, NoSQL, Oracle Database, PL/SQL, Microsoft SQL Server, Transact-SQL (T-SQL), PostgreSQL, MongoDB, Cassandra, Elasticsearch, Ingres

**Engineering Practices:** Technical Leadership, Code Review, Mentoring, Docker, Kubernetes, CI/CD, Git, Jenkins, Maven, Linux, Unit Testing, Test-Driven Development, Clean Coding, Scrum, Agile Methodologies, Kanban

**Enterprise / Legacy Stack:** EJB, J2EE Application Development, JSF, JSP, JBoss EAP, Tomcat, WSO2, JasperReports, iReport, UML, AJAX, JavaScript, jQuery, RichFaces, PrimeFaces, AngularJS

### PROFESSIONAL EXPERIENCE

#### Senior Backend Engineer | Quartile (US-based digital marketing company)

Sep 2021 - May 2026 | New York City Metropolitan Area / Remote

**Technologies:** C# (.NET 6/7/8), Python, FastAPI, Pydantic, pandas, Azure Functions, Azure Service Bus, Azure Storage, SQL Server, T-SQL, OpenAPI, Confluence, Jira, Claude, ChatGPT

- Built and maintained high-volume backend applications using C# and Python on Azure Functions, supporting large-scale advertising data workflows for Quartile's AI-powered retail media optimization platform.
- Implemented asynchronous integrations with Azure Service Bus to improve reliability and scalability across data processing, automation, ad optimization, labeling, budgeting, and product generation workflows.
- Designed and optimized complex T-SQL stored procedures and SQL Server functions to support business rules, promotions, and high-volume advertising operations.
- Developed customer portal integrations using OpenAPI, improving external integration capabilities and supporting a smoother client onboarding experience.
- Used AI tools such as Claude and ChatGPT to support development, automation, analysis, documentation, and productivity across backend delivery.

#### Senior Java | Scala Software Engineer | SoftDesign Consultoria e Sistemas

Mar 2014 - Sep 2021 | Porto Alegre, Brazil

Client projects: Osvaldo Cruz Hospital (~2014-2015) | AutoDB (~2015-2017) | Sicredi (~2017-2021). Sicredi is one of Brazil's largest cooperative financial institutions.

**Technologies:** Java 8, Python 3.x, Spring Boot 1.x/2.x, Spring Cloud, Kotlin 1.3+, Scala 2.11/2.12, Play Framework 2.x, Akka Actors 2.5.x, Apache Flink 1.x, Kafka 2.x, Oracle, MongoDB 3.x, Cassandra 3.x, MariaDB, Elasticsearch 2.x/5.x, AWS, Git, Jenkins, Microservices, BFF, Event-Driven Architecture

- Led the architectural pivot at Sicredi from an initial Python 3.x Personal Finance Manager crawler proof of concept to a production-ready event-driven architecture using Scala, Akka Actors, Apache Flink, Kafka, MongoDB, and microservices.
- Enabled real-time high-volume financial data processing, safe reprocessing, and strong data integrity; the solution later served as a reference architecture for additional Sicredi Digital initiatives.
- Developed Java 8 and Kotlin 1.3+ BFF layers for Sicredi's Checking Account and Savings Account domains using Spring Boot, Kafka, and Oracle, improving backend integration, maintainability, and microservices adoption across digital banking services.
- Built two major versions of the AutoDB platform: an initial Java 8 + Spring Boot + MariaDB implementation and a redesigned Scala + Play Framework + Elasticsearch version, enabling a configurable vehicle catalog with flexible data organization.
- Served as backend lead for the Horus Clinic hospital system at Osvaldo Cruz Hospital, using Java 8 to design complex scheduling and resource optimization logic that made safe vaccine-dose sharing operationally viable in collaboration with the frontend team.

## Senior Java Engineer / Scrum Master | TechnoCorp - Grupo Dimed / Panvel

Mar 2012 - Mar 2014 | Porto Alegre, Brazil

Panvel is one of Brazil's largest pharmacy chains and part of Grupo Dimed.

**Technologies:** Java 7, Spring Framework 3.x/4.x, Spring Security, Hibernate 4.x, JSF 2.x, RichFaces, PrimeFaces Mobile, Quartz, JBoss, Web Services

- Contributed to the full Java backend rewrite of Panvel's e-commerce platform, modernizing the architecture while preserving critical business rules.
- Led Scrum adoption within the team and helped deliver Panvel's first mobile e-commerce version using PrimeFaces Mobile, expanding the platform to mobile channels as part of the omnichannel strategy.
- Participated in the migration of legacy backend systems to JSF and contributed to the migration from WebSphere to JBoss, reducing infrastructure complexity and improving operational efficiency.
- Worked on performance, scalability, and high-volume transaction handling to support growing e-commerce and omnichannel operations in a retail environment with strict business rule requirements.

## Java Software Engineer | CWI Software - CIEE-RS

Mar 2007 - Mar 2012 | Porto Alegre, Brazil

**Technologies:** Java 5/6, Struts 1.x/2.x, Spring 2.x/3.x, Hibernate 3.x, JSP, Ingres, SVN, Hudson

- Worked for over 5 years on the evolution and maintenance of CIEE-RS's high-volume web recruitment platform, connecting candidates to internship and apprenticeship opportunities across Brazil.
- Participated in the migration of a legacy EJB-based system to a Java 6 architecture using Struts and Hibernate, improving maintainability, developer productivity, and long-term platform stability.
- Supported production operations, performance optimization, incident resolution, and continuous delivery of new features in a mission-critical, high-traffic environment serving candidates and partner companies.

## Java Software Engineer | MSDevelop - Sicredi

Dec 2006 - Mar 2007 | Porto Alegre, Brazil

**Technologies:** Java 5, Spring Framework 2.x, JSF, Hibernate 3.x, Oracle, PL/SQL

- Contributed to Sicredi's legacy banking core migration to Oracle FLEXCUBE, supporting the transition of a major cooperative financial institution's core system.
- Developed and maintained Java systems for CEP and street registration, adapting Brazilian address data to the international format required by the new core banking platform.
- Supported data migration and consistency work between legacy systems and the new banking platform, helping preserve data integrity during the core system replacement.

## Java Software Engineer | Intelly

Dec 2005 - Dec 2006

**Technologies:** Java 5, Struts Framework 1.x, JSP, JasperReports, iReport, JFreeChart, Cewolf, HTML, JavaScript, AJAX, VSS

- Developed corporate web applications for marketing operations, including company agenda, newsletter, SMS campaigns, reports, and dashboards using Java and Struts.
- Implemented backend routines for bulk newsletter and SMS processing, improving automation and operational efficiency.
- Built Java classes, JSP pages, DAO-based data access, reports, and AJAX-driven interfaces for enterprise web applications.

## Java Software Developer | Tecno Consulte Informática

Apr 2005 - Dec 2005

**Technologies:** Java 1.4, Struts Framework 1.x, JSP, JavaScript, HTML, SQL, E-Gen

- Developed modules for a web-based ERP system using Java, Struts, JSP, SQL, and E-Gen.
- Implemented business rules, backend components, database integrations, Java classes, ActionForms, JSP pages, and web interfaces for operational process automation.

## EDUCATION

**Universidade Pitágoras Unopar Anhanguera** | Postgraduate Specialization - Java Applied Engineering (Java Elite + AI), in progress | May 2026 - May 2027

Focus: Java 17+, Spring Boot 3, Quarkus, Microservices Architecture, Corporate AI Integration, LangChain4j, RAG, MCP patterns, and intelligent agent development.

**Uniritter** | Postgraduate Specialization - Technologies Applied to Information Systems with Agile Methods | 2011 - 2013

Focus: Information Technology, Agile Methods, Software Development, and IT Management.

**Universidade Luterana do Brasil (ULBRA)** | Technologist Degree - Systems Analysis and Development | 2005 - 2011

Focus: Information Technology, Software Development, Systems Analysis, and Databases.

## CERTIFICATIONS

Oracle Certified Associate, Java SE 5/SE 6 | Java SE 5 Programmer | Java EE 5 Business Component Developer | Java EE 5 Web Component Developer | Java EE 6 Web Services Developer | JEE 6 Java Persistence API Component Developer | Professional Scrum Master I (PSM I) - Scrum.org
